

Mohanad Kalloub

Data Management & Documentation, Supply chain, Procurement

kalloubmohanad1@gmail.com | +972-595372607 | [LinkedIn](#) | Gaza, Palestine

PROFILE

Data management and documentation professional with over two years supporting local and international organizations in Gaza under active emergency conditions. Experienced in data collection and entry, data quality assurance, verification against source documents, and maintaining structured electronic and hard-copy filing systems that stand up to audit. Comfortable working through large volumes of records accurately and consistently, and used to coordinating between field teams, partner organizations and suppliers while handling sensitive information confidentially. This work has run alongside full-cycle procurement and logistics responsibilities. Fluent in Arabic and English, available for remote and field-based work.

WORK EXPERIENCE

Procurement, Supply Chain & Data Management – Arben

Jan 2024 – August 2026 · Gaza, Palestine

Managed procurement, supply chain, logistics and data activities for local and international organizations throughout the emergency, owning the cycle from request through delivery and maintaining the records and reporting behind it.

Data Management & Reporting

- Collected, recorded and submitted data through field monitoring activities, ensuring timely and accurate data entry.
- Maintained procurement, inventory, fleet and asset trackers in Excel and other systems, keeping records accurate, complete and up to date.
- Conducted data quality checks; identifying and correcting missing, inconsistent or duplicated information and verified entries against source documents.
- Organized and maintained electronic and hard-copy records, including filing, scanning, archiving and document retrieval.
- Prepared regular activity reports and summaries used by teams for planning, follow-up and documentation of results.

Coordination

- Coordinated daily between suppliers, partner organizations, field teams and internal staff, keeping multiple parallel activities moving under access, supply and connectivity constraints.
- Followed up on requests, delays and discrepancies with the parties involved, prioritising fairly and tracking each case through to resolution.

Procurement & Supply Chain

- Ran the full procurement cycle: processed purchase requests, sourced suppliers, collected and compared quotations, and followed purchase orders through to delivery and confirmation.
- Built and maintained a wide supplier network, managing many supply relationships reliably and negotiating under rapidly shifting market conditions.
- Verified deliveries against agreed specifications, quantities and timelines, resolving discrepancies directly with suppliers.
- Planned and sequenced procurement and delivery activities against operational timelines, identifying bottlenecks early and adjusting plans as conditions changed.

Logistics, Warehouse & Inventory

- Coordinated transportation and monitored deliveries under rapidly changing operational conditions.
- Documented goods received and dispatched, conducted stock reconciliations, and maintained audit-ready inventory records.
- Conducted field visits to suppliers and delivery sites, coordinating on the ground and following each delivery through to completion.

SKILLS

Procurement: Purchase requests, supplier sourcing, quotations and bid comparison, purchase order follow-up, supplier negotiation and coordination

Warehouse & Inventory: Goods Received Notes (GRNs), waybills, stock records, Gifts-in-Kind (GIK) documentation, physical stock counts, stock reconciliation
